Auto-Couplings Fluids

- **Self-aligning feature**
- **Connection under full working pressure**
- **Panel and thread versions available**

At the core of electronic systems, CEJN's blind-mate couplings and nipples with extreme non-spill feature guarantee perfect sealing during operation. The light and compact auto-coupling is mounted on rackable/blade systems in supercomputers and data centres where DLC (Direct Liquid Cooling) technology is used. The range of products is resistant to vibration and corrosion and, if necessary, the design enables connection and disconnection under full working pressure.
